

Junior/Intermediate Quality Assurance Analyst

ES3™ is a leading global competitor in the development of interactive television applications. With high profile partners and clients, its fast paced and challenging environment provides for a fulfilling career.

We are a close knit team, looking for a dynamic, determined, and positive individual to contribute their talents towards our exciting product development initiatives.

ES3 is actively searching for a junior to intermediate-level QA analyst to assist in providing strategic assistance in QA initiatives.

About the Job

The selected individual will be responsible for the following:

- Working directly with the Systems Quality Assurance Manager
- Reporting defects using defect tracking tool
- Work with business analysts and developers to make sure test results are aligned with desired functionality
- Creating and executing QA test plans
- Provide regular progress and status reports to the QA Manager and/or Project Manager
- Perform server log file and database verification
- Perform regression testing on internal, beta, and production versions
- Review User Guides to ensure product documentation is technically accurate
- Verify that project documentation is sufficiently detailed to support development of QA materials

Experience

“There is no substitute for experience”

– Proverb

- At least 2 years experience in a software testing or quality assurance role, or related work experience (QA)
- BS in Computer Science, Computer Engineering or equivalent work experience
- Experience with documenting test results
- Relevant experience providing QA analysis on interactive TV applications
- Ability to identify risks and provide solutions for mitigation
- MS SQL Server, XML, Java.
- Strong understanding of various media platforms: TV, mobile, web and desktop applications

- Excellent written and verbal communication skills
- Excellent time management skills
- Experience in establishing quality measurement metrics

Qualifications

- Strong ability to handle multiple priorities, work under pressure and meet stringent deadlines
- Ability to work independently and in a team as and when required
- An eye for identifying issues and facilitate issue resolution
- Accuracy and attention to detail are essential
- Sound judgment and problems solving ability
- Professional tact is essential

If you have experience in Quality Assurance-related fields, this is the perfect opportunity to jump-start your career!
